## EXPERIENCE

### Shopmatic, Bangalore — Front end developer

[Shopmatic](#) is an international ecommerce company that was launched with the intent of helping anyone going online, succeed in selling their products and services.

MARCH 2020 - PRESENT

**Tech stack**- React, Nodedsd, Elasticsearch, PWA, Next.js.

Built Google spot for merchants where I created a PWA storefront and also handled Firebase cloud functions, Firestore.

Have taken care of the whole deployment process in GCP and created separate services for each merchant.

Have done complete revamp of storefront of all merchants in Next.js and worked with Elasticsearch and Kibana to get related products and search products using “significant\_term” aggregation.

Worked in a feature where we need to give role based authentication, which contains more than 15 roles.

### Self Employed, Freelancer – MERN stack developer

January 2019 - MARCH 2020

**Tech stack** - HTML5, CSS3, Sass, JS, React.js, Node.js, MongoDB.

Created a Billing System for a timber selling shop with the help of Vanilla javascript, Node.js and MongoDB

Created a website for a textile firm completely from scratch using HTML5, CSS3, SCSS and Vanilla javascript.

Created a website for a Areca plate selling firm using HTML5, CSS3, SCSS and Vanilla javascript.

### Tech mahindra, Chennai — Software engineer

AUGUST 2016 - November 2018

I worked in “Book my show” where I handled the architecture and Frontend project setup from scratch.

## SKILLS

**Basic skills** - HTML5, css3, vanilla javascript.

**Frontend framework** -

React js, Material UI, Antd.

**Backend framework** -

Node js.

**Database** -

MongoDB, Google Firestore and Realtime database.

**Cloud services** -

Google cloud functions, Firebase hosting, Heroku, AWS s3, GCP services, FCM.

**CI/CD tools** -

CircleCI.

**Tools** -

JIRA, Invision, Figma, Storybook, Kibana.

## EDUCATION

### Pesto Ninja programme

May 2021 - AUGUST 2021

**Nandha engineering college, Erode —**  
Bachelors in Information technology

SEPTEMBER 2012 - AUGUST 2106

Worked in Nissan projects in various development phases.

Worked in creating react components for “BookMyshow”.

## PROJECTS

**Doccords**– *A cloud based pwa app where user can store and share their health related documents and also will educate user with our articles section*

[Website](#) | [Github Link Frontend](#) | [Github Link Backend](#)

- Created all the artefacts for development phase including PRD, Wireframes for both web and mobile and Mindmap for better understanding of the user flow
- Created a complete full fledged React application with all the necessary development tools like Linting, formatting the code using github pre hook and CI/CD with the help of Circle CI
- PWA app where users can store and share their documents through email of their own or their family members.

Tech Stack: Reactjs, PWA, Redux, Redux-thunk, Firebase, Nodejs, MongoDB, CircleCI

**Arasu Tex**–*A Simple showcase website for a textile firm*

[Website](#) | [Github Link](#)

- My first freelancing website where we used heroku forms for collecting contact info

Tech Stack: HTML5, CSS3, SCSS, Vanilla JS

**Laminus Exports** –*A Simple showcase website for a Areca plate selling firm*

[Website](#) | [Github Link](#)

- Its complete mobile responsive site where we showcased all the different areca leaf products.

Tech Stack: HTML5, CSS3, SCSS, Vanilla JS

**Shakti Murugan Timbers**– *Billing site where the client can calculate particular wood related calculations.*

[Website](#) | [Github Link](#)

- Once they are done with the calculation and click on print it will get stored in MongoDB.

Tech Stack: HTML5, CSS3, SCSS, Vanilla JS, Bootstrap, Node.js, MongoDB

**Portfolio**– *My portfolio site where I followed Mobile first development strategy*
